BALDWIN BOXALL
COMMUNICATIONS

The PC1137 is a general purpose relay board with six 5A relays. All contacts are brought out independently, each relay can be operated in isolation or in 3 separate groups. Pads are also provided on the PCB to links for these groups. Pads are also provided on relay contacts to enable them to be linked if required. Terminal blocks are fitted on the edge of the PCB for terminating to these points. Relay coils are 24V @ 22mA each.
