

# Touch Screen Control

Omnicare is an addressable voice communication system that allows disabled refuge, fire telephones, emergency/steward telephones and disabled toilet alarms to be connected to one master panel. Touch screen control adds further flexibility to the system.

## Omnicare

### BENEFITS & FEATURES:

- Each system is bespoke, designed specifically for the system it is intended. The display is a 'button layout' view.
- Can be installed remotely from the master panel, providing a stylish option for reception/lobby areas.
- Suitable for single panel or networked systems.
- Simple to navigate touchscreen control.
- 'Administrator' and 'guest' password protected accounts.
- Displays the condition of each zone:
  - Standby (no current activity).
  - Calling.
  - Occupied.
  - Conversation.
- Replicates the status of the master/slave control panel(s).
- Provides the operator with complete control of the Omnicare system.
- PC will emit sound to mimic activity at master panel.
- History and fault log with realtime date stamp. Enables administrators to view activity and response times on the system.
- High resolution LCD touch screen control system.
- Fanless solid state PC, connected to the touch screen.

- Connection to the Omnicare panel can be via RS232, RS485 or Ethernet. Providing plenty of options for installers.
- Please note: a master control panel must be installed on the system - which is fully compliant to BS5839-9. With the addition of a PC to an Omnicare network the fire panel activation facility becomes unavailable.

### SYSTEM COMPONENTS:

(Master panel can be any from Omnicare range.)

- BVOCTSB:** Software with button style graphics, touch screen PC and UPS.
- BVOCTSG:** Software with full graphical layout, touch screen PC and UPS.
- BVOCTSHS:** Desktop telephone handset.
- BVOCTSHSM:** Monitor mounted telephone handset.

See [OmnicarePLUS](#) for large networked systems.
