

Remote Lamp Buzzer

Our EVC systems have been installed in many prestigious sites worldwide. Both systems are networkable, with all outstations being powered from the line - there is no need for a separate local power source.

The BVOCCA remote lamp buzzer is an optional unit which alerts personnel if a call is received but not answered within a preset time.

Omnicare

Care2

BENEFITS & FEATURES:

- Provides a visible and audible signal of a call on the system.
- Enables remote indication of a call to the control panel.
- Can be used with Omnicare and Care2 systems.
- Ideal for placement in reception areas or similar attended parts of a building - especially where the main control panel may, on occasion, be left unmanned.
- Connected via the 'delayed call' output on the panel with an adjustable delay function (settable between 0-90 seconds).
- Self-powered from the line.
- Brushed stainless steel grade 304 finish.
- Dimensions (mm) W x H 85 x 85.
